

TP-5815Pro & KS-6215-Plus Support VIA C7-2.0G CPU Announcement

TAIPEI, TAIWAN, Oct. 27th, 2008 –

Dear Partners

We have continuously received some demands of CPU upgrade to support VIA C7-2.0G on the models of TP-5815-Pro and KS-6215-Plus for the market competition consideration. So we have tuned KS-6215-Plus for such a CPU upgrade without changing on the system hardware. However due to higher CPU efficiency to generate more heat, for TP-5815Pro, we need to add in one CPU cooling fan to get sufficient heat dissipation.

Now the solutions are ready and we are pleased to offer these two models options with MOQ 50 units each for the material and production arrangement. Please contact our account sales manager for more details, if you will have demand on them. We will list the above mentioned option on Q1,2009 price list.
